APHEX SYSTEMS ANNOUNCES NEW 140A SERIES AUDIO INTERFACES AT 2010 WINTER NAMM

SUN VALLEY, CA (January 14, 2010) – Aphex has introduced three new higher-end digital audio conversion/interface products at Winter NAMM. The **Model 141A**, **Model 142A**, and **Model 144A** are high-quality interface/converter devices that are SMUX capable, allowing them to be used at 44.1kHz, 48kHz, 88.2kHz, and 96kHz sample rates. The company's original 140 Series will remain in the Aphex line to provide a lower-cost alternative for customers who don't require the new flexible, high sample-rate **140A** Series.

Originally designed as an accessory for Aphex' Anaconda Digital Snake system, the 140 Series has gained popularity on their own as a reliable and high-quality method of interfacing analog, ADAT, and AES audio signals.

The Aphex **Model 141A** is an 8-channel ADAT-to-Analog converter. High quality DACs translate the ADAT signal into 8 discrete analog outputs. Each output is individually trimmable by 12dB. Maximum output at 0dBfs is +24dBu. The **Model 142A** is an 8-channel analog-to-ADAT converter. High quality A/Ds convert 8 analog inputs into an ADAT output. Each input is trimmable by 12dB and has a clip LED. +24dBu is calibrated to 0dBfs. External work clock input is through BNC with an internal 75Ω termination.

NAMM 2010: APHEX INTRODUCES 140a SERIES INTERFACE/CONVERTERS

Page 2

The **Model 144A** is an AES-to-ADAT and ADAT-to-AES bidirectional interface. It converts 4 stereo pairs of AES or S/PDIF to 8 channels on ADAT, and vice versa. It boasts a sensitivity measurement of 0.5V for its AES input for use with all professional equipment that implements an AES digital interface.

All models in the 140A Series are housed in the same half-rack chassis as the original 140 Series, which are easy to mount in racks or to use as tabletop devices. Aphex will be selling the 140A Series interface/converters through select authorized Aphex dealers.

About Aphex Systems

Founded in 1975, Aphex Systems is the leading developer and innovator of signal-processing, dynamics control, microphone preamplifiers and analog-to-digital conversion systems. Aphex products are designed for a wide cross section of professional end users around the world. For more information call 818/767-2929 or visit www.aphex.com.
